SUMMARY

IT Services Technician with 3+ years of hands-on technical support experience and current enterprise laptop deployment work at Deloitte. B.S. in Computer Science with experience supporting Windows and macOS endpoints, Microsoft 365 and Google Workspace, hardware/software deployment, user accounts and access controls, ticketing, network troubleshooting, documentation, and end-user training. Builds PowerShell and batch automation to reduce repetitive provisioning work and improve device-readiness checks. Comfortable prioritizing issues in fast-paced environments, escalating complex problems, and communicating clear resolutions to technical and non-technical users.

TECHNICAL SKILLS

- **Endpoint Support:** Windows 10/11, macOS, Microsoft 365, Google Workspace, hardware/software troubleshooting, desktop and laptop configuration, printers, scanners, peripherals
- **Deployment & Operations:** OS imaging, laptop pre-provisioning, software deployment, patching and updates, build QA, inventory and asset tracking, device intake, shipping coordination
- **Identity & Administration:** Active Directory, Group Policy, Windows Server, user account provisioning, permissions and access controls, password management
- **Networking:** LAN and wireless troubleshooting, internet connectivity, basic network configuration
- **IT Service Management:** Help desk ticketing, issue documentation, escalation, root cause analysis, knowledge base and user-guide creation
- **Scripting & Automation:** PowerShell, Batch scripting, Python, JavaScript, automated software-install and login workflows
- **Training & Security:** Technician mentoring, end-user training, process documentation, security permissions, confidentiality, data protection

PROFESSIONAL EXPERIENCE

IT Support Technician | Deloitte

February 2026 - Present

Support an enterprise laptop deployment pipeline by imaging, provisioning, validating, and preparing systems for end users while improving repetitive technician workflows.

- Image and pre-provision Dell and HP laptops, install required end-user software, validate configurations, and perform QA before devices are packed and shipped
- Troubleshoot provisioning, software-installation, popup, and device-readiness issues; share fixes with teammates and escalate problems that require additional support
- Built and deployed Batch and PowerShell scripts that streamline bulk software installation, handle common popups, and run self-audit checks so technicians can verify device readiness consistently
- Work within an enterprise-managed endpoint environment and maintain accurate device intake, inventory, asset tracking, packaging, and shipping records
- Collaborate with deployment teammates to identify edge cases, refine workflows, document repeatable fixes, and meet changing operational priorities

Student Technology Assistant (Team Leader) | MTSU Walker Library

Spring 2022 - December 2024

Served as a first-line technology contact across a multi-department library environment, handling end-user issues, account access, workstation support, documentation, and technician guidance.

- Provided phone, email, and in-person support for Windows/macOS workstations, Microsoft 365, Google Workspace, printers, scanners, desktop applications, and presentation systems
- Administered Windows Server environments including Active Directory user management, Group Policy configuration, user provisioning, and security permission maintenance
- Diagnosed LAN and wireless connectivity issues, workstation failures, software conflicts, and recurring support problems; escalated complex issues when needed
- Documented issues and resolutions in a help desk ticketing system and used recurring ticket patterns to identify root causes and reduce repeat incidents
- Created technical documentation, knowledge-base-style guides, and hands-on training for staff; led and mentored student technicians on troubleshooting and support procedures
- Developed Batch scripts that automated staff login workflows while preserving account permissions and access controls across multiple departments

EDUCATION

B.S. in Computer Science & Minor in Entrepreneurship | Middle Tennessee State University

August 2020 - December 2024

3.6 GPA | Dean's List 4 times

KEY PROJECTS

Bulk Software Installation Automation | Deloitte

Spring 2026 - Present

- Audited a manual enterprise laptop provisioning workflow and identified repetitive software-installation steps that created technician friction and inconsistent verification
- Built Batch and PowerShell automation that launches required applications, handles common popups, and performs self-audit checks before device handoff
- Refined the solution with deployment teammates to account for edge cases and keep the process usable across shared team workflows
- Used AI-assisted development to accelerate troubleshooting, iterate on script logic, and improve reliability without replacing technician validation

Automated Login Script & System Administration | MTSU Walker Library

Fall 2023

- Diagnosed recurring staff login friction and built a Batch script to streamline the workflow
- Maintained user permissions and access controls during rollout across multiple departments
- Produced clear documentation and led hands-on training so non-technical staff could use the process independently

Presentation A/V & Exhibit Technology | MTSU Walker Library

Fall 2022 - Winter 2024

- Configured and maintained cameras, microphones, projectors, and display systems for presentations, exhibits, and live events
- Worked directly with staff to diagnose technical issues under time pressure and provide clear end-user guidance
- Created user guides and repeatable procedures for reliable event and presentation technology support
