

Drew Lickman - Video Game Specialist

540-322-7186 / Murfreesboro, TN (Central Time) / contact.drew.business@gmail.com

linkedin.com/in/drew-lickman / github.com/DrewLickman

Available for remote contract work across US time zones

SUMMARY

Experienced PC gamer and technical specialist focused on evaluating interactive digital environments for objective completion, movement responsiveness, and simulation consistency. Strong keyboard-and-mouse/WASD proficiency and a proven documentation style built around clear bug reporting, reproducible issue steps, and concise structured feedback. Background in troubleshooting and validation supports reliable analysis of AI-generated world behavior in remote, task-driven QA and AI training workflows.

CORE SKILLS

- **PC Gameplay Fundamentals:** Keyboard-and-mouse control fluency, standard WASD movement, and first-person/third-person camera conventions
- **Objective Execution:** Structured test-case execution, objective tracking, and validation of completion criteria in changing scenarios
- **Evaluation & Feedback:** Responsiveness analysis, interaction smoothness review, and world/environment consistency checks
- **QA Workflow:** Bug reporting, repro steps, issue tracking, triage-ready notes, and regression-style retesting habits
- **Technical Analysis:** Edge-case identification, pattern recognition, and root-cause-oriented troubleshooting
- **Communication:** Clear structured writing for technical observations, issue summaries, and actionable recommendations

GAME EXPERIENCE

- **Team-Based Competitive (School Team Experience):**

Overwatch (varsity), Valorant (junior varsity)

Focus: coordinated team gameplay review, communication patterns, objective execution, and round-by-round adjustment with teammates

- **FPS / Action Competitive:**

Counter-Strike 2, Call of Duty, Fortnite, Marvel Rivals

Focus: aim/movement responsiveness, ability readability, map flow, and objective pressure handling

- **Roguelikes:**

Risk of Rain 2, Balatro, Hades, Inscryption

Focus: run-to-run consistency, scaling balance, RNG impact on decision-making, and combat/system feedback loops

- **RPG / Open-World Systems:**

Elden Ring, Baldur's Gate 3, Divinity: Original Sin 2, GTA V, Wizard 101, Pokemon

Focus: progression clarity, encounter balance, AI behavior consistency, and exploration pacing

- **Sandbox / Emergent Systems:**

Minecraft, Terraria, Garry's Mod, Trove, For The King, Magic: The Gathering (in-person)

Focus: interaction smoothness, rules consistency, pathing/physics edge cases, and emergent strategy behavior

- **Gameplay Depth:** Multiple hundreds of hours in each listed title, with a consistent focus on identifying inconsistencies and documenting actionable observations.

ADDITIONAL RELEVANCE

- **AI Literacy & Current Awareness:** Regularly follow AI news and product updates, and actively use ChatGPT, Claude, Gemini, Grok, and Cursor Composer to stay current on model behavior and capabilities.
- **Builder Mindset:** Build small personal projects across websites, games, and practical tools/extensions, with a focus on iterative improvement and usability.
- **Early Technical Initiative:** Self-hosted Minecraft and Call of Duty servers in middle/high school for friends, reinforcing hands-on systems thinking and long-term technical curiosity.
- **Motivation:** Pursued computer science through an early interest in game development and a sustained interest in how interactive systems work.

PROFESSIONAL EXPERIENCE

IT Support Technician | Deloitte
February 2026 - October 2026

Executed repeatable validation workflows with clear documentation in a fast-paced environment.

- Performed high-volume imaging and pre-provisioning against defined objectives and quality criteria
- Validated software setup before handoff, flagging inconsistencies and documenting corrective actions
- Tracked intake, build, and shipping states in issue-tracking workflows to maintain reliability
- Coordinated with team members to prioritize issues and maintain predictable turnaround
- Captured reproducible technical notes to improve repeatability and troubleshooting speed

Student Technology Assistant (Team Leader) | MTSU Walker Library
Spring 2022 - Winter 2025

Provided technical support focused on precise diagnosis, structured bug reporting, and clear communication.

- Handled 100+ patron technical issues per semester across hardware, software, and network support
- Recorded issue-tracking notes with symptoms, context, outcomes, and repro steps for follow-up
- Guided users through step-by-step procedures while monitoring completion and usability friction
- Escalated complex problems with concise evidence and impact summaries
- Created practical troubleshooting procedures that reduced ambiguity in repeat issues

RELEVANT PROJECT EXPERIENCE

2D Platformer: "Code Runner" | University Team Project
Spring 2024

- Led coordination for a 5-person Unity game project with structured task tracking, issue tracking, and iterative playtesting cycles
- Tested movement responsiveness and core gameplay interactions, identifying collision and control inconsistencies for fixes
- Logged gameplay bugs with reproducible steps and prioritized issue lists to support efficient team debugging
- Validated post-fix behavior through regression-style retesting to improve consistency of player interactions
- github.com/DrewLickman/Code-Runner

EDUCATION

B.S in Computer Science & Minor in Entrepreneurship @ Middle Tennessee State University
August 2020 - December 2024

3.6 GPA | Dean's List 4 times
